BPW Agricultural Solutions

Collection of arguments

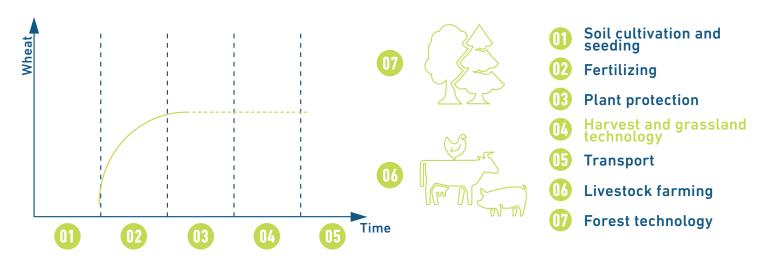

Field of application: Harvest and grassland technology

EN

FIELD OF APPLICATION

THAT'S HOW WE THINK HARVEST

The ability to work reliably under all conditions. we support this with our application-specific running gears with compact design and the outstanding BPW quality.

Our decades of experience in axles and running gear technology guarantee measurable advantages even in the toughest work environment.

Partnership through a lifetime

SALES AND ORDER LOGISTICS

- Comprehensive support and flexibility in ordering
- Professional organization for optimized lead time
- Personal contact person

APPLICATION CONSULTATION

- Technical support to identify the most suitable solution for the application
- Ensuring compatibility between components and systems used
- Navigate through the diverse range of products on the market
- Assistance during commissioning

CONSTRUCTION

- Development in partnership with the vehicle manufacturer
- Development of components, axles and suspension units
- FEM designed components and systems
- Brake and bearing calculation
- _ In-house test vehicle and brake test bench
- _ Lifetime, and fatigue tests

PRODUCTION

- High competence in mechanical fabrication
- Surface treatment and assembly
- Quality assurance certificates
- Product specific assembly points

CUSTOMER SERVICE

- Comperhensive customer services
- Complete maintenance documentation
- In the scope of a technical agreement, the deployment of our fitters on-site is possible

SPARE PARTS SUPPLY

- Longer service life due to perfectly matched individual components
- More than 3.200 service station world wide with original BPW parts
- _ Individual spare parts lists and drawings
- Spare parts groups for standard products
- Every axle and running gear is documented, for easy component identification

General product benefits

Minimal corrosion damage and longer service life of the complete chassis due to the KTL surface treatment

Large safety reserves in case of a temporary and extreme overloading

FEM designed, tried and tested components

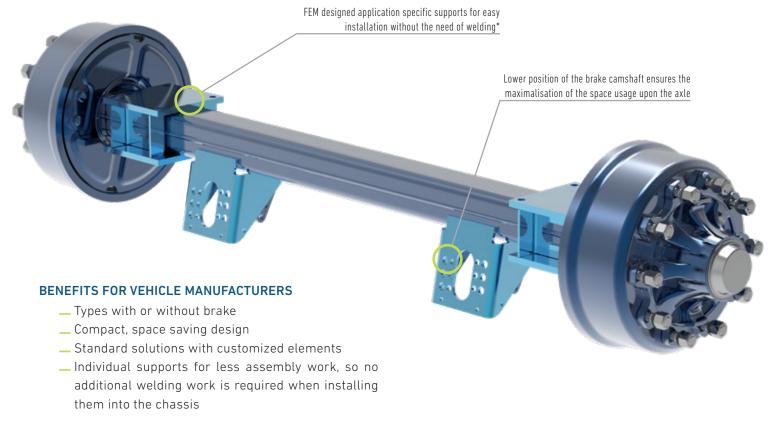

Axles are either being supplied with the latest sensor technology or prepared for their installment

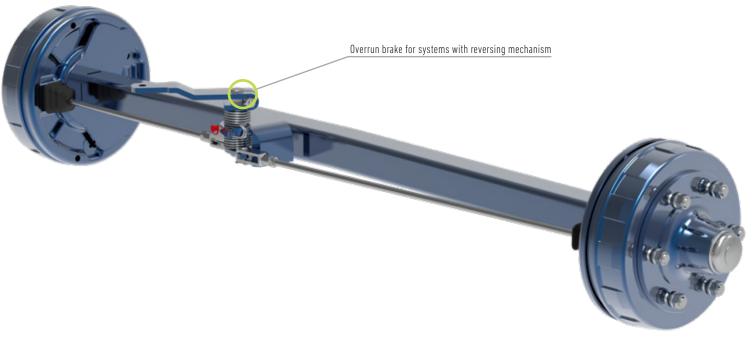

EU compliant brakes

UNSPRUNG SOLUTIONS

Single axles

Axle stubs

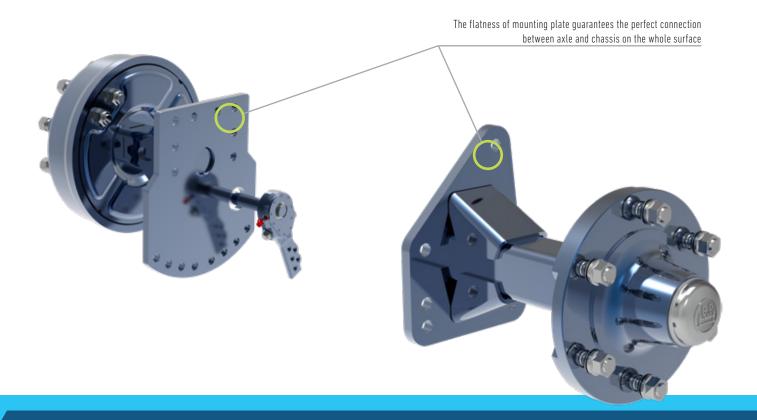

BENEFITS FOR VEHICLE MANUFACTURERS

- Developed for confined space conditions
- _ Compact design with minimal width
- No additional welding needed during installation into the chassis

Stub axle welded with camber for optimal road contact

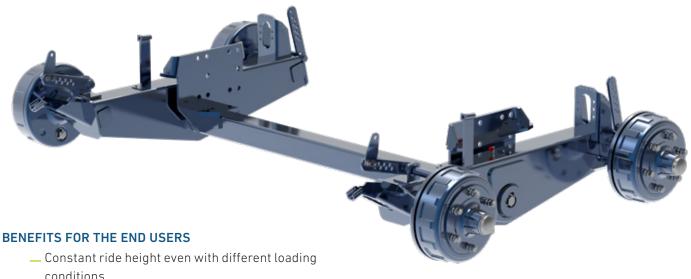

UNSPRUNG SOLUTIONS

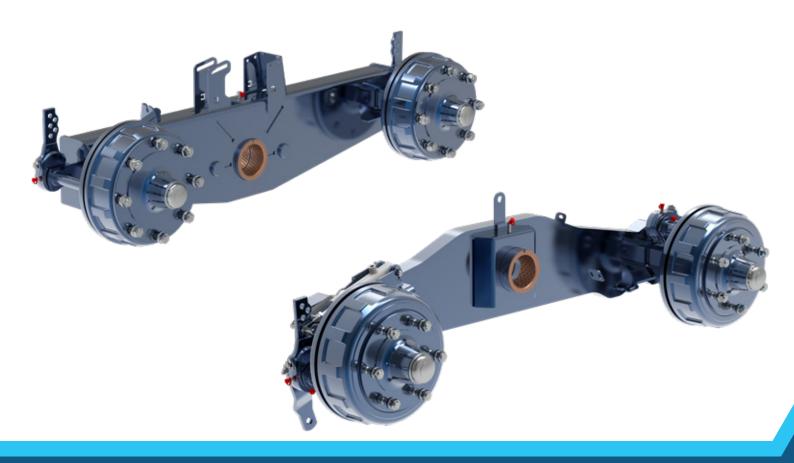

SUSPENSION UNITS

Pendle-arms and pendle units

- conditions
- _Low drag resistance and excellent driving characteristics due to the asymmetrical pendulum structure
- Good ground adaptation and optimal ground compaction

- Compact, space saving design
- __ Large side-independent equalization

Bogies

BENEFITS FOR THE END USERS

 Low drag resistance and good ground adaptation due to the asymmetrical mounted springs

BENEFITS FOR VEHICLE MANUFACTURERS

- Optimized design for better flow of forces between axle and chassis
- Easy variable track and support centre values

Overrun hitches

BENEFITS FOR VEHICLE MANUFACTURERS

- Simple and variable assembly due to less attachment points
- __ Continuous adjustment of the holding force

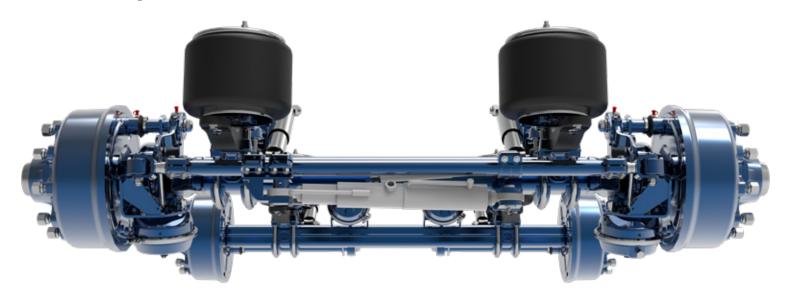

BENEFITS FOR THE END USERS

- Outstanding braking values in combination with BPW axles
- Simple hitching through height adjustment device (Klemmfix)

SUSPENSION UNITS

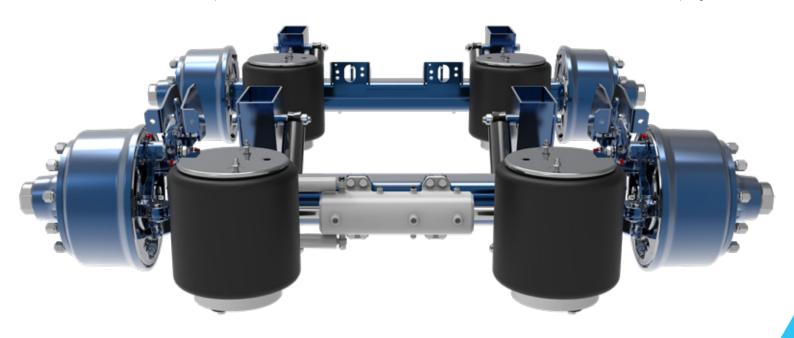

Air suspension

BENEFITS FOR THE END USERS

- Outstanding driving comfort for on-road and off-road use
- Even brake and tire wear
- __ Even ground pressure
- Constant ride height even with different loading conditions
- Optimum transmission of forces due to a special trailing arm and formfitting axle connection for lower service costs and longer service life
- _ Maintenance free suspension

- Various control functions:
 - _ Leveling valve
 - __ Axlelift
 - __ Lifting & lowering function
 - __ Traction help
- Optional with frame and complete braking system
- Steering variations
- Well-known and proven BPW components and solutions based on the semi-trailer program

Hydropneumatic suspension unit

BENEFITS FOR VEHICLE MANUFACTURERS

- Optional individual frame solutions with little assembly effort
- Passive and electronic suspension control options
- Preparation for electronic force-steering
- Various control functions:
 - _ Leveling valve
 - __ Axlelift
 - _ Lifting & lowering function
 - _ Traction help

BENEFITS FOR THE END USERS

- Better driving comfort due to the wide support of the hydraulic cylinders
- High roll stability due to the cross connection of the hydraulic system
- Safe and comfortable driving even with a high center of gravity of the vehicle
- Outstanding driving comfort for on-road and off-road use

SUSPENSION UNITS

OPTIONS

BENEFITS FOR VEHICLE MANUFACTURERS

- Variable position of brake cylinder bracket
- Protected brake camshaft
- Patented steering cylinder, that functiones in self steering and also force steering mode
- Prepared for electronic force steering
- Integrated adapter for steering angle sensor

BENEFITS FOR THE END USERS

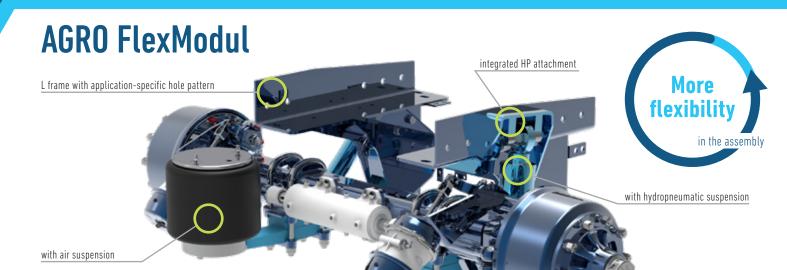

- The AGRO Turn steering design allows sharp turning and accurate trailing under all driving circumstances
- __ Less steering force due to the reduced caster offset
- Excellent maneuverability with 28° maximal steering angle in force steering mode
- Fluted thrust plate for better steering properties

BENEFITS FOR THE END USERS

- Better ground protection due to the reduced slippage of the tractor drive wheels
- _ Tractors with less power can pull heavier loads
- __ Better "driving force to total weight" ratio
- The brake pad service is carried out according to the well-known BPW method without dismantling the drive motor.

- Compact design
- Can be combined with all suspension systems due to different brake shaft positions
- High torque and wide speed range
- With CTIS preparation as standard
- Usable with tractor hydraulics or additional hydraulics
- Freewheel when driving on-road

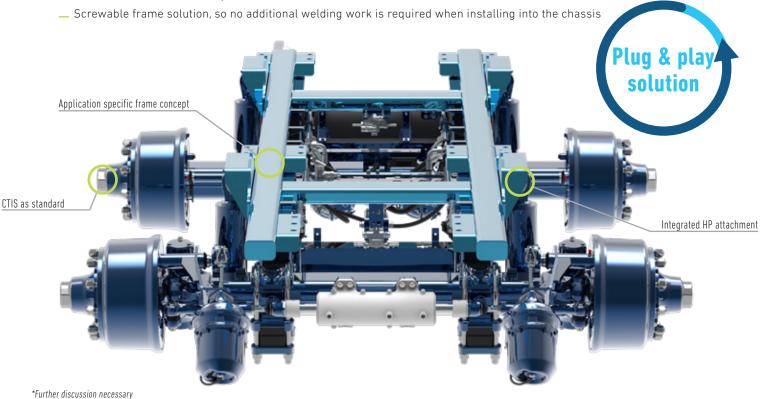

BENEFITS FOR VEHICLE MANUFACTURERS

- _ Identical frames for HP and air suspension
- _ Screwable suspension module, therefore no additional welding work required when installing into the chassis
- Long service life due to the optimal connection between the axle and chassis
- Rigid or steered versions are available for modular use
- Custom hole patterns possible if required

AGRO Flexframe

- Ready to use complete system with suspension unit, suspension control, brake system, sensors and steering system
- Available for HP and Air suspension

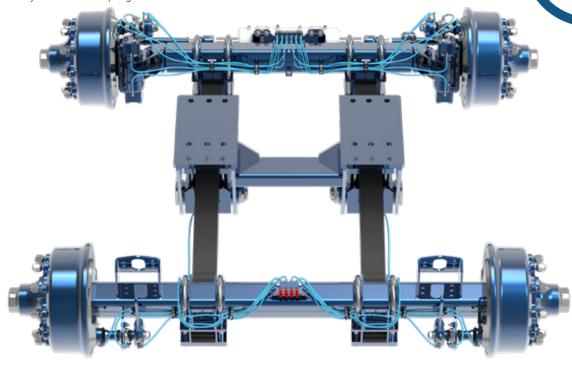

OPTIONS

Central lubrication system

BENEFITS FOR THE END USERS

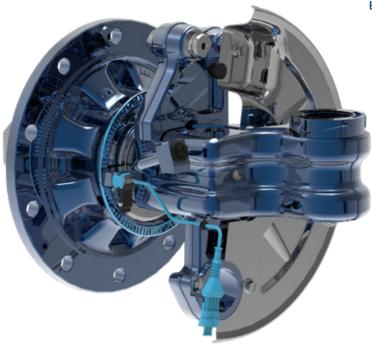

- One centralised point for lubrication
- _ Less time required for lubrication
- Possibility of automatic progressive lubrication

Central tyre inflation system preparation

SDS* and ABS sensor

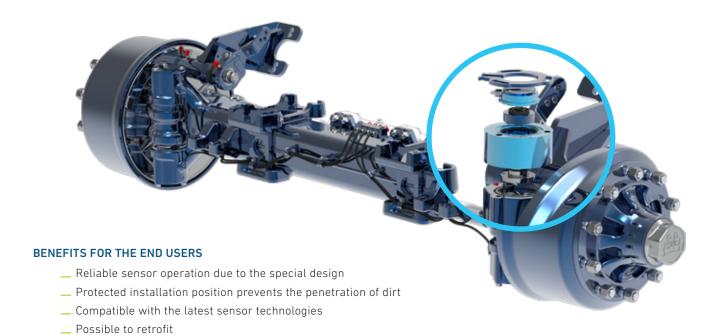

BENEFITS FOR THE END USERS

- Speed measurement from just 1 km/h (SDS)
- __ Determines the direction of the rotation (SDS)
- BPW patent: extra protection against twisting (SDS)
- Optional spreading rate adjustment (SDS)
- Highway compliance (ABS)
- Special protection design for sensors against dirt, water and mud

Uninterrupted and reliable sensor signal

Integrated steering angle sensor

*BPW Speed & Direction of rotation Sensor
