HYDRO-PNEUMATIC SUSPENSION

For High Performance

Custom Product Line

The brands of the BPW Group

BPW Agrar

Perfect is just enough.

HYDRO-PNEUMATIC SUSPENSION

Engineered for those who demand more

BPW's hydro-pneumatic running gear delivers outstanding roll stability, safety and driving comfort for vehicles with high centre of gravity or demanding load conditions.

With up to 270 mm axle equalisation, the system ensures optimal load distribution and smooth handling.

This means maximum safety and comfort, even in the toughest conditions.

Wide cylinder support

High spring travel and complete, dynamic equalisation

Special axle connection

Modular design

VARIETY OF HP-MODULES

Standard Modules

BENEFITS

Designed for Manufacturers

- ✓ Good driving comfort and good manoeuvrability even with narrow frames.
- ✓ Preparation for electronic force-steering.
- ✓ Steering options.
- ✓ Various variations with:
 - ABS / SDS / Steering angle sensor
 - Available with AGRO Hub 2.0.

- ✓ Optional individual frame solutions with little assembly effort.

Optimised for End Users

- ✓ Wide hydraulic cylinder support for enhanced ride quality.
- ✓ Cross-linked hydraulic circuit ensures high roll stability.
- ✓ Safe even with high center of gravity.
- ✓ Low-maintenance HP cylinders and suspension components.
