

AGRO DRIVE 10.5 – HYDRAULIC DRIVE AXLE FROM BPW AGRAR

THE AXLE THAT KEEPS YOU MOVING – CUSTOM PRODUCT LINE

Hilly terrain, wet ground and heavy loads – sometimes the tractor alone is not enough. The AGRO Drive 10.5 solves this problem. As a hydraulic drive axle for agricultural trailers, it actively supports propulsion, reduces tractor wheel slip and protects the soil. All with proven BPW quality and a maintenance concept that requires no additional work.

BENEFITS:

Outstanding off-road performance

Active drive powered by the Black Bruin BPW50 motor – safe and reliable even on slopes and soft ground.

More load with a smaller tractor

The trailer actively assists with traction: lighter tractors can move heavier loads, allowing more payload per trip and fewer trips overall.

Soil-friendly

Less tractor wheel slip means reduced soil compaction and less field damage – better for the soil and better for your operation.

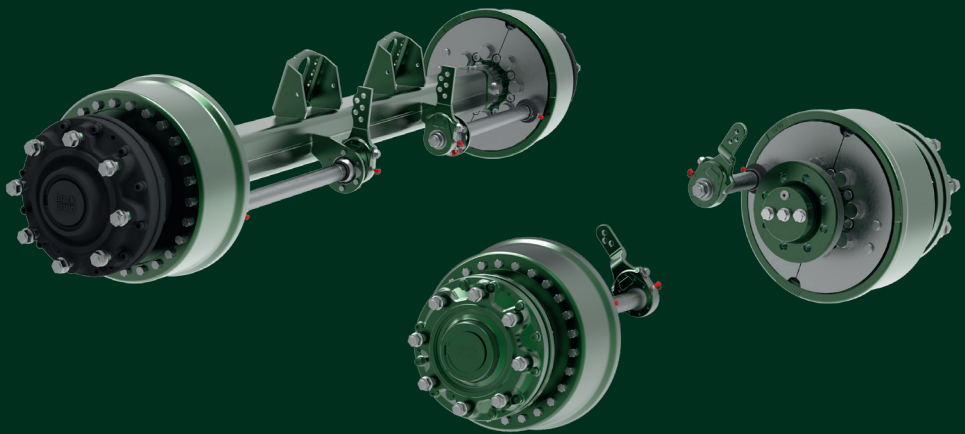

Maintenance without removing the motor

Brake lining replacement using the proven BPW procedure – no need to remove the hydraulic motor.

TECHNICAL DATA:

Axle beam	120 × 15 mm
Brake	N 4012-4 (400x120)
Static axle load	10,5 Tonnes at 60 km/h
Minimum rim diameter	19,5"
Wheel connection	8 × M20 × 1,5 mm
Motor	Black Bruin BPW50

TYPICAL APPLICATIONS:

Forage wagons · Push-off trailers · Forestry trailers · Balers

Standard where possible. Custom where needed. Supported throughout the lifecycle. Please contact our sales team to find the right solution for your needs.
