

NEW CORE SOLID AXLE RANGE

REENGINEERED FOR GREATER EFFICIENCY - CORE PRODUCT LINE

The new solid axle range is the cost-efficient axle solution within the BPW Core line – developed for vehicle manufacturers who expect BPW quality while also requiring a competitive solution. Featuring an advanced sealing system and direct compatibility with the VB Core suspension, it is built to withstand the demanding conditions of everyday agricultural use.

BENEFITS:

Optimised sealing solutions

The double-lip seal provides excellent sealing performance and a long service life. The grease-lubricated hub seal offers reliable protection against dust and mud.

One standard, many possibilities

Core axles combine the efficiency of standardised solutions with a design that meets the diverse requirements of agricultural vehicle types.

BPW brake technology

The N3006 (300 × 60) and N4008 (400 × 80) brake types have been further developed, while the N3009 (300 × 90) has been newly designed.

Optimal price-performance ratio

CORE positioning: BPW-level quality with the cost efficiency required for high-volume OEM projects.

TECHNICAL DATA:

SQUARE SHAFT		STORAGE	BRAKE					
	100 mm	GS 10000	Unbraked			N 3411 340x110	N 4008 400x80	N 4012 400x120
	100 mm 90 mm	GS 8500	Unbraked			N 3411 340x110	N 4008 400x80	
	90 mm 80 mm	GS 7000	Unbraked		N 3009 300x90	N 3411 340x110		
	80 mm 70 mm	GS 5000	Unbraked	N 3006 300x60	N 3009 300x90			
	70 mm 60 mm	GS 4000	Unbraked	N 3006 300x60				
	55 mm	GS 2500	Unbraked	N 3006 300x60				

■ Phase 1 ■ Phase 2 ■ Phase 3

TYPICAL APPLICATIONS:

Agricultural trailers and semi-trailers, tippers and dump vehicles, fertiliser vehicles and tandem configurations – wherever protection, durability and cost efficiency are essential.

Standard where possible. Custom where needed. Supported throughout the lifecycle. Please contact our sales team to find the right solution for your needs.
