YOUR STEERING AID FOR THE NARROW COUNTRY LANES AND SPACES

The BPW additional steering - Active Reverse Control - is an electro-hydraulic steering system that automatically steers the self-steering axle in case of reverse in manoeuvring speed range.

Can be used with combined cylinder (AGRO Turn & GSLA self-steering axle). Available with HP, Bogie, Mechanical and Air types of suspension.

KEY APPLICATION AREAS

- Loader wagons
- Tippers
- Transport trailers

Managed via software

Regulation
2 SDS sensors for extended
safety functions

YOUR ADVANTAGES

- Preset software
- Set up through application
- No additional approval needed
- No mechanical parts (eg. Sensor) between the tractor and the trailer
- Optimal tire wear compared to self-steering

Manual control via control panel

Oil and power is supplied from the tractor

READY

AGRO Turn or GSLA 11010 with combined cylinder and sensors
ARC Assembly kit

STEADY

Fit the system based on instructions
Commission (set-up) through application
